## FSA1153

## DP3T USB Type C Audio and UART Analog Switch with OVP

## Description

The FSA1153 is a bi-directional, low power, high speed USB2.0 Type-C, Audio and UART analog switch with overvoltage protection. It is configured as a Double-Pole, Triple Throw (DP3T) switch. The FSA1153s protection function prevents damage to Type-C USB 2.0 port pins caused by high voltage. It provides a receptacle side OVP function on the USB 2.0 data pins and will turn off the relative switch once the voltage level on DN_L or DP_R exceed the OV threshold. It can withstand up to 20.5 V DC.

## Features

- DP3T USB Type C Audio and UART Analog Switch
- $\mathrm{V}_{\mathrm{DD}}: 2.7 \mathrm{~V}$ to 5.5 V
- $\mathrm{I}_{\mathrm{CC}}: 35 \mu \mathrm{~A}$ Typical
- USB Switch - -3 dB Bandwidth (Sdd21): 850 MHz
- Audio Switch:
- Negative Rail Capability: -3 V to +3 V
- Audio Path $\mathrm{R}_{\mathrm{ON}}=1 \Omega$ (Typ.) at 3.3 V
- THD + N = $-110 \mathrm{~dB} ; 1 \mathrm{~V}_{\mathrm{RMS}}, 32 \Omega$ Load; $\mathrm{f}=20 \mathrm{~Hz} \sim 20 \mathrm{kHz}$ with A-Weighted Filter
- UART Switch:
- RON: $5 \Omega$ (Typ.) at 3.3 V
- Signal Range: 0-4.4 V
- High Power Supply Ripple Rejection
- 20.5 V Overvoltage Protection on DN_L/DP_R
- 20.5 V Surge Protection on DN_L/DP_R

## Applications

- Mobile Phones
- Tablets
- Notebook PC

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

1. The input and output negative ratings may be exceeded if the input and output diode current ratings are observed.
2. $\mathrm{V}_{\mathrm{SW}}$ refers to analog data switch paths.

## Application Information

Over-Voltage Protection
The FSA1153 features over-voltage protection (OVP) on the receptacle side pins DN_L and DP_R which will switch off the internal signal routing path if the input voltage
exceeds the OVP threshold. When an over voltage condition has occurred the switch will open immediately and remain open until the over voltage condition is removed.

#### Abstract

ON Semiconductor and (ON are trademarks of Semiconductor Components Industries, LLC dba ON Semiconductor or its subsidiaries in the United States and/or other countries. ON Semiconductor owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of ON Semiconductor's product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using ON Semiconductor products, including compliance with all laws, regulations and safety requirements or standards regardless of any support or applications information provided by ON Semiconductor. "Typical" parameters which may be provided in ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. ON Semiconductor does not convey any license under its patent rights nor the rights of others. ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold ON Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the part.
