

NL3S588

USB 2.0-Capable Ultra-Low THD DPDT Switch

The NL3S588 is a single supply, bidirectional, double-pole/double-throw (DPDT) switch suitable for both hi-fidelity audio and high-speed data applications.

The NL3S588 features ultra-low distortion, high OFF-Isolation analog switches that can pass analog signals that are positive and negative with respect to ground. It is targeted at consumer and professional DC-coupled GND-referenced audio switching applications such as computer sound cards and home theater products.

The NL3S588 may also be used in high-speed differential data routing applications. Both channels are USB 2.0-compliant.
