

# maXTouch 1188-node Touchscreen Controller Product Brief

### Description

The mXT1189T-AT/mXT1189T-AB uses a unique charge-transfer acquisition engine to implement Microchip's patented capacitive sensing method. Coupled with a state-of-the-art CPU, the entire touchscreen sensing solution can measure, classify and track a number of individual finger touches with a high degree of accuracy in the shortest response time. The mXT1189T-AT/mXT1189T-AB allows for both mutual and self capacitance measurements, with the self capacitance measurements being used to augment the mutual capacitance measurements to produce reliable touch information.

# maXTouch<sup>®</sup> Adaptive Sensing Touchscreen Technology

- Up to 32 X (transmit) lines and 52 Y (receive) lines
- A maximum of 1188 nodes can be allocated to the touchscreen
- Touchscreen size 10.99 inches (16:10 aspect ratio), assuming a sensor electrode pitch of 5.5 mm. Other sizes may be possible with different electrode pitches and appropriate sensor material
- Multiple touch support with up to 16 concurrent touches tracked in real time

### **Automotive Applications**

- AEC-Q100 Qualified
- Developed following Automotive SPICE<sup>®</sup> Level 3 certified processes
- CISPR-25 compliant (for both mutual and self capacitance measurements)

### **Touch Sensor Technology**

- Discrete/out-cell support including glass and PET filmbased sensors
- On-cell/touch-on display support including TFT, IPS and OLED
- Synchronization with display refresh timing capability
- Support for standard (for example, Diamond) and proprietary sensor patterns (review of designs by Microchip recommended)

### **Front Panel Material**

- Works with PET or glass, including curved profiles (configuration and stack-up to be approved by Microchip)
- Glass 0.4 mm to 4 mm with GFF stack, 0.55 mm to 4 mm with OGS stack (dependent on screen size, touch size, configuration and stack-up)
- Plastic 0.2 mm to 3 mm (dependent on screen size, touch size, configuration and stack-up)

#### **Touch Performance**

- Moisture/Water Compensation
  - No false touch with condensation or water drop up to 22 mm diameter
  - One-finger tracking with condensation or water drop up to 22 mm diameter
- · Glove Support
  - Multiple-finger glove touches up to 1.5 mm thickness (subject to stack-up design)
  - Single-finger glove touch up to 5 mm thickness (subject to stack-up design)
- Mutual capacitance and self capacitance
  measurements supported for robust touch detection
- Noise suppression technology to combat ambient and power-line noise
  - Up to 240 Vpp between 1 Hz and 1 kHz sinusoidal waveform
  - Up to 20 Vpp between 1 kHz and 1 MHz sinusoidal waveform
- Burst Frequency
  - Controlled Tx burst frequency drift over process and temperature range
- Scan Speed
  - Configurable to allow for power and speed optimization

### **On-chip Gestures**

• Reports one-touch and two-touch gestures

#### Keys

 Up to 32 nodes can be allocated as mutual capacitance sensor keys (subject to other configurations)

#### **Enhanced Algorithms**

- Lens bending algorithms to remove display noise
- Touch suppression algorithms to remove unintentional large touches, such as palm
- Palm Recovery Algorithm for quick restoration to normal state

#### **Power Saving**

- Programmable timeout for automatic transition from active to idle states
- · Pipelined analog sensing detection and digital processing to optimize system power efficiency

### **Application Interfaces**

- I<sup>2</sup>C-compatible slave with support for:
  - Standard mode (up to 100 kHz)
  - Fast mode (up to 400 kHz)
  - Fast-mode Plus (up to 1 MHz)
  - High-speed mode (up to 3.4 MHz)
- SPI slave interface (up to 8 MHz)
- Interrupt to indicate when a message is available
- SPI Debug Interface to read the real-time raw data for tuning and debugging purposes

### **Power Supply**

- Digital (Vdd) 3.3 V nominal
- High voltage external X line drive (XVdd) up to 9.0 V

#### Package

• 144-pin LQFP 20 × 20 × 1.4 mm, 0.5 mm pitch

#### **Operating Temperature**

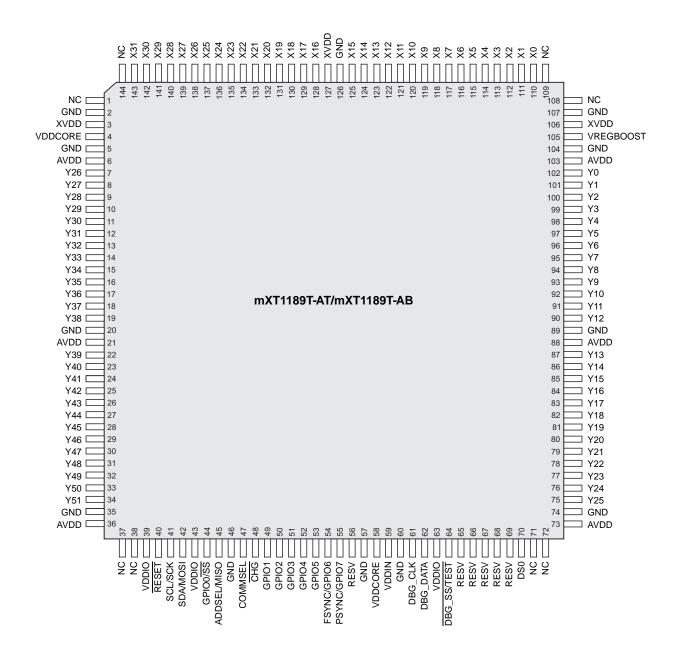

- mXT1189T-AT: -40°C to +85°C (Grade 3)
- mXT1189T-AB: -40°C to +105°C (Grade 2)

### **Design Services**

- Review of device configuration, stack-up and sensor patterns
- Custom firmware versions can be considered, such as for specific gestures or proprietary OEM host communication protocols
- Contact your Microchip representative for more information

#### **PIN CONFIGURATION**

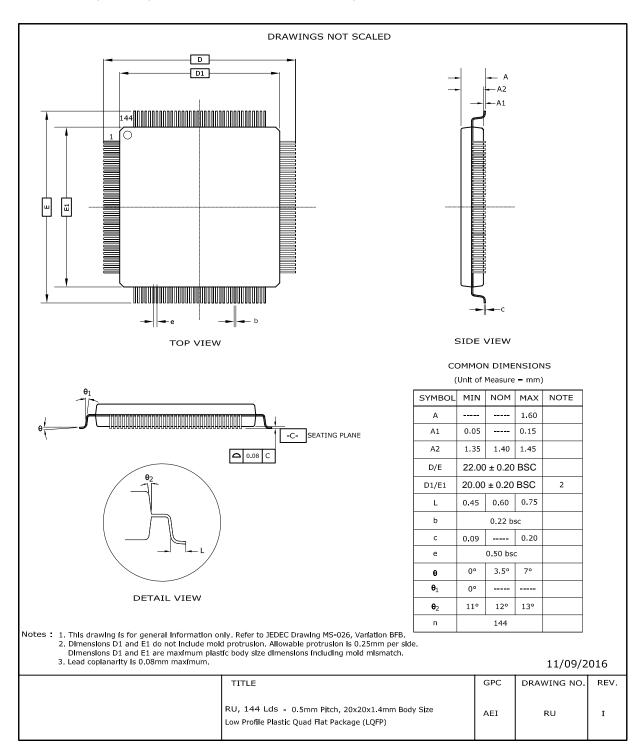

Pin Configuration – 144-pin LQFP

# 1.0 PACKAGING INFORMATION

The following section gives the technical details of the package for the device.

# APPENDIX A: REVISION HISTORY

### **Revision A (September 2017)**

Initial edition for firmware revision 1.0.AB - Release

### **PRODUCT IDENTIFICATION SYSTEM**

The table below gives details on the product identification system for maXTouch devices. See "Orderable Part Numbers" below for example part numbers for the mXT1189T-AT/mXT1189T-AB.

To order or obtain information, for example on pricing or delivery, refer to the factory or the listed sales office.

### **Orderable Part Numbers**

Orderable Part Number	Firmware Revision	Description	
ATMXT1189T-AT (Supplied in trays)	1.0.AB	144-pin LQFP 20 × 20 × 1.4 mm, RoHS compliant Operating temperature range –40°C to +85°C (Grade 3)	
ATMXT1189T-ATR (Supplied in tape and reel)		Automotive grade sample; suitable for automotive characterization	
ATMXT1189T-AB (Supplied in trays)	1.0.AB	144-pin LQFP 20 $\times$ 20 $\times$ 1.4 mm, RoHS compliant Operating temperature range –40°C to +105°C (Grade 2) Automotive grade sample; suitable for automotive characterization	
ATMXT1189T-ABR (Supplied in tape and reel)			

#### Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

Information contained in this publication regarding device applications and the like is provided only for your convenience and may be superseded by updates. It is your responsibility to ensure that your application meets with your specifications. MICROCHIP MAKES NO REPRESEN-TATIONS OR WARRANTIES OF ANY KIND WHETHER EXPRESS OR IMPLIED, WRITTEN OR ORAL, STATU-TORY OR OTHERWISE, RELATED TO THE INFORMA-TION, INCLUDING BUT NOT LIMITED TO ITS CONDITION, QUALITY, PERFORMANCE, MERCHANT-ABILITY OR FITNESS FOR PURPOSE. Microchip disclaims all liability arising from this information and its use. Use of Microchip devices in life support and/or safety applications is entirely at the buyer's risk, and the buyer agrees to defend, indemnify and hold harmless Microchip from any and all damages, claims, suits, or expenses resulting from such use. No licenses are conveyed, implicitly or otherwise, under any Microchip intellectual property rights unless otherwise stated.

Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company's quality system processes and procedures are for its PIC<sup>®</sup> MCUs and dsPIC<sup>®</sup> DSCs, KEELOQ<sup>®</sup> code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001:2000 certified.
